The City has committed a serious error in processing this application as substantially complete. The applicant has failed to even make a good faith attempt to attain a co-location site for its purported coverage deficiency. It's dismissive and negligent regard for City code and application requirements suggest that their application borders on the fraudulent. Further, the applicants own website, data, and statements assert that they already had adequate coverage throughout the area concerned.

The application should be rejected as not meeting the requirements of the process, with prejudice. I suggests that they be held in contempt for behavior in the application process.
